

# Kids Club January Activity Sheet

THE ACADEMY  
OF NATURAL SCIENCES  
of DREXEL UNIVERSITY

**Activity #1:** When groups of different species live and work together, they become a community. Look at *What Eats What* and tell a staff member about the different types of fish in the stream community.

**Activity #2:** Can you find a diorama with more than one type of animal?

Get your **January** stamp at the Visitor Services Desks. Do you have **eight** stamps yet? **If you do, it's time to collect your prize in the Academy Shop!**

**Regular Hours:**  
Monday–  
Friday,  
10 a.m.–4:30  
p.m.

Weekends and  
Holidays,  
10 a.m.–5 p.m.

**Can you find all  
of these words?**

*caring  
community*

*energy  
family*

*food*

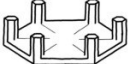

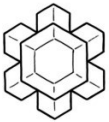

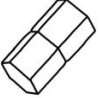

*happy*

*share*

*species*

*warmth*

*zoo*

				
Simple Prisms	Solid Columns	Sheaths	Scrolls on Plates	Triangular Forms
				
Hexagonal Plates	Hollow Columns	Cups	Columns on Plates	12-branched Stars
				
Stellar Plates	Bullet Rosettes	Capped Columns	Split Plates & Stars	Radiating Plates
				
Sectored Plates	Isolated Bullets	Multiply Capped Columns	Skeletal Forms	Radiating Dendrites
				
Simple Stars	Simple Needles	Capped Bullets	Twin Columns	Irregulars
				
Stellar Dendrites	Needle Clusters	Double Plates	Arrowhead Twins	Rimed
				
Fernlike Stellar Dendrites	Crossed Needles	Hollow Plates	Crossed Plates	Graupel

Types of Snowflakes

## Search for Snowflakes!

Go outside and look at what types of snowflakes are falling. You can collect snowflakes on black construction paper, or even on the sleeve of your winter jacket!

Do any of yours look like the ones in this chart? Draw what you see here:

## Answers from the December Activity Sheet

**Activity #1:** Fishers, small carnivorous animals related to weasels, are the primary predators of porcupines, but quills have been found embedded in coyotes, cougars, bobcats, foxes, lynxes, bears, wolves, and even great horned owls.

**Activity #2:** Monkeys eat the pods, which are the fruit of the cacao tree.
