

SEPTEMBER ACTIVITY SHEET

Join Eddie at the Academy to earn stamps and win a prize!

ACTIVITY #1

Meet our malacology graduate students at Scientist Saturdays, September 15. Find out the names of shells you have found at nearby beaches.

ACTIVITY #2

Visit the investigation station near the Moose diorama on Fridays and Saturdays, 11 a.m. to 3 p.m., to learn about cells, the "building blocks of life."

ACTIVITY #3

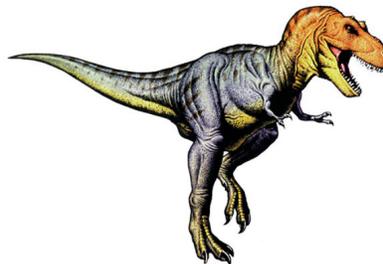

Our diorama renovations will be complete soon! Stop by the Takin and the Gorilla dioramas to take a peek at the progress and see our staff at work.

I AM NOT A DINOSAUR!

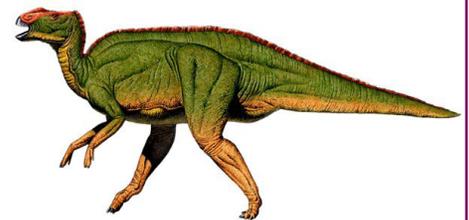

Join Marty the Moose for story time on Mondays at 11 a.m. in the Auditorium. This month, Marty is reading *I Am NOT a Dinosaur!* by Will Loch. Can you identify the prehistoric animals below that are **not** dinosaurs? Circle them.

Pteranodon

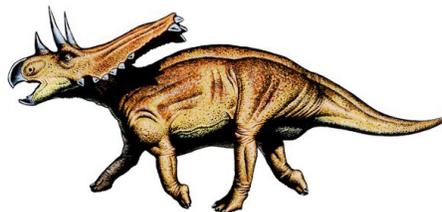

Tyrannosaurus rex

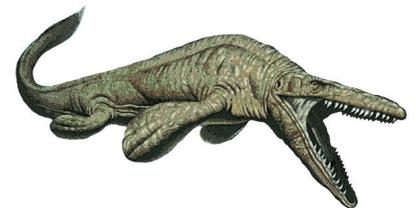

Hadrosaurus

Elasmosaurus

Chasmosaurus

Tylosaurus

Answer: Pteranodon, elasmosaurus and tylosaurus are not dinosaurs.

Don't forget your stamp.

Get your monthly stamp at the admissions desks. If you have eight stamps, it's time to collect your prize in the Academy Shop!

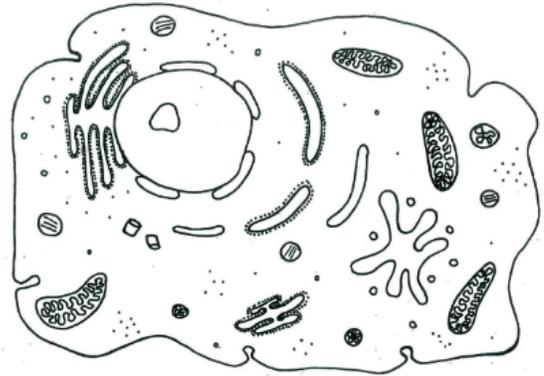

SILLY FOR CELLS

You can visit the investigation station near the Moose diorama on Fridays and Saturdays from 11 a.m. to 3 p.m. to see cells up close. Cells are important biological units that make up every living thing!

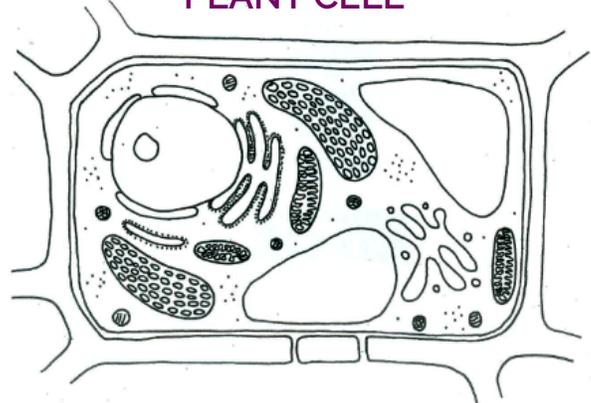

While you're at the investigation station, explore these interesting questions with our education staff member:

1. What does a plant cell use chloroplast for and why does the animal cell not have one?
2. Why does a plant cell have a cell wall while an animal cell does not?
3. Why is the nucleus called the brain of the plant cell? Why is it so important?

ANIMAL CELL

PLANT CELL

UPCOMING EXHIBITS AND EVENTS

Xtreme Bugs

Open through
January 21, 2019

Scientist Saturday

September 15

Members' Night

Friday, October 12
