Pet Home Inventory

Generally, animals can be divided into two categories, domestic and wild. A domestic animal has been selectively bred and genetically adapted over generations to live alongside humans. A wild animal grows or lives wild in an area without being introduced by humans. Both types of animals need a good habitat in which to live. A good habitat provides an animal or plant with food, water, shelter and space. Does your pet have a good habitat?

Know before you begin

- This activity can be done inside or outside
- All supplies are easy to find, substitute or leave out entirely
- Please choose a safe space to play

Materials

- Paper and marker
- Pet to observe

Instructions

Use the questions below to do a home inventory for your pet.

Questions:

1. Where does your pet sleep?
2. Does your pet have water?
3. What does your pet eat?
4. Does your pet have space to move around? How do they get exercise?
5. What toys or decorations does your pet have?
6. Can you play with or hold your pet? How do you do this safely?
